

POWER LIFT HF 3S 3500 BMW

Variable height

Maximal height of 4904 mm
with optional column extension

HyperFlow® Technology:

Automatic purging of the hydraulic system
in the highest position, automatic
synchronization of the arms

NT Technology:

4 cylinders
2 independent
hydraulic circuits

Precise positioning

Smooth operation and variable lowering speed thanks
to the Nussbaum-Commander

SIMPLY FAST. TRIPLE SAFETY.

- Triple safety: automatic safety lock plus two independent hydraulic circuits
- Extremely fast lifting and lowering times: 23 / 14 secondes
- Very low maintenance: no synchronization cables, no pulleys
- Parking position for comfortable working
- Exceeds the strict specifications of the DIN EN 1493:2010
- Less moving parts, less maintenance

SPEED AND SAFETY

Fastest lifting and lowering times, redundant safety, high productivity, intelligent features and life cycles up to 30 years: It is not without reason that Nussbaum lifts are among the world's leading equipment in automotive workshops. Now we have made our best technologies even better: the result is HF 3S, the hydraulic high-speed 2-post lift from Nussbaum. Simply fast. Variable precision lowering. Extremely low-noise. **And triple safety.**

THE RIGHT DATA FOR SUCCESS

Lifting capacity (kg)	3500
Lifting / lowering time approx. (sec)	23 / 14
Lifting height (mm)	2005
Lowest lifting point (mm)	95-140
Total height column (mm)	4040
Top connection (mm)	4104-4904
Total width (mm)	3230
Drive-through width (mm)	2400
Column distance (mm)	2646
Arm-extraction dimensions (mm)	505-823 / 940-1495
Motor (kW)	3
BMW article number	BMW 69 501 071
